SUMMARY

Data Analyst and Computer Science undergraduate skilled in SQL, Python, Pandas, PostgreSQL, Power BI, and Excel, with hands-on experience analyzing datasets, building interactive dashboards, and deriving actionable business insights. Experienced in data cleaning, exploratory data analysis, customer segmentation, KPI analysis, and advanced SQL using CTEs, subqueries, CASE statements, and window functions. Built and deployed end-to-end analytics projects covering customer churn, retail sales, and consumer behavior.

EDUCATION

KIIT, Kalinga Institute of Industrial Technology , Bhubaneswar
B.Tech - Computer Science and Engineering - CGPA - 8.65

2022 – 2026
Bhubaneswar, Odisha

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, C/C++, Java

Data Analysis & Visualization: Pandas, NumPy, Power BI, Excel, Matplotlib, Seaborn, Plotly

Databases: PostgreSQL, MySQL, MongoDB

Data Analytics: Data Cleaning, EDA, Data Visualization, KPI Analysis, Customer Segmentation, Statistical Analysis

Tools & Deployment: Jupyter Notebook, VS Code, Git, GitHub, Streamlit

PROJECTS

Credit Card Customer Churn Analysis [🔗](#) [📄](#) | Python, PostgreSQL, Power BI, Pandas **Jun 2026**

- Analyzed **10,127 credit-card customers** using **Python, Pandas, and PostgreSQL**, identifying churn patterns across demographics, transaction activity, credit utilization, income segments, card categories, and customer tenure.
- Developed an **interactive Power BI dashboard** and churn-risk analysis using **CTEs, subqueries, CASE statements, RANK, NTILE, and window functions**, identifying **1,627 churned customers** and a **16.07% churn rate**.

Blinkit Sales & Outlet Analytics [🔗](#) [📄](#) | Python, Pandas, PostgreSQL, Power BI **May 2026**

- Analyzed **8,523 retail records** using **Python, Pandas, and PostgreSQL** to evaluate **\$1.20M+ in sales**, product performance, outlet characteristics, customer ratings, and retail trends.
- Developed an **interactive Power BI dashboard** and SQL analyses using **GROUP BY, CASE statements, aggregations, and window functions** to evaluate sales by item type, outlet size, location, fat content, and outlet type.

Customer Shopping Behavior Analysis [🔗](#) [📄](#) | Python, PostgreSQL, Power BI, Pandas **Apr 2026**

- Performed end-to-end analysis of **3,900 customer records** using **Python, Pandas, and PostgreSQL**, applying data cleaning, segmentation, aggregation, and exploratory analysis to identify **purchasing and revenue trends**.
- Developed an **interactive Power BI dashboard** and **10+ business-focused SQL analyses** using **CTEs, subqueries, CASE statements, and window functions** to evaluate customer behavior, product performance, discount usage, and revenue contribution.

ACHIEVEMENTS

- Solved **600+** problems on **LeetCode**, demonstrating strong problem-solving and algorithmic skills. [🔗](#)
- Achieved a peak **LeetCode contest rating of 1743**.
- Ranked **2323 globally** in **LeetCode Weekly Contest 505**.
